## The Academy at St James - Aspire, Achieve, Believe

### **CURRICULUM VISION**

At The Academy at St James, we aim to provide ALL our children with an engaging, purposeful curriculum that inspires, motivates, challenges and excites our pupils. We believe that providing our pupils with key experiences will enhance their learning and personal development to help them become successful, confident learners.

Each year group has an engaging curriculum that provides our children with the opportunity to learn about a variety of exciting themes. We have carefully thought about the needs of our children at The Academy at St James, and have planned a series of themes that will provide excellent learning opportunities where our children can develop their basic skills, enjoy exciting real-life experiences and make good progress.

It is our intention to provide our children with the best, first-hand experience that will engage their interests and drive their learning with a key purpose. Each theme has a clear 'Hook / Engagement' experience and an end purpose that drives their learning. In addition to this we ensure that our children have a stimulating learning environment that motivates and enhances their ability to learn.

We have ensured that our school curriculum provides the best opportunity for all our children to thrive regardless of their abilities, whilst ensuring we have the best quality opportunities for cross curricular English and Maths across all our themes.

We are committed to ensuring that our children at The Academy at St James receive a curriculum that they can be proud of, which enables them to enjoy their learning and become successful, confident learners.
