

The Academy at
St James
Aspire, Achieve, Believe

Geography Vision

By the end of their time at St James our children will:

- Children are aware that they are learning geography!
- We want our children be active global citizens who value, respect and appreciate planet Earth and its peoples.
- We want our children to value their own, and others, surroundings and understand how they can impact our changing world.
- Lessons develop geography concepts, skills and knowledge.
- Questions are used to develop an enquiring, geographical mind.
- We use globes, atlases, maps and compasses to expand our knowledge.
- We study physical and human features of geographical locations locally, nationally and internationally.
- We make links between our local and worldwide geography.
- Recording in a variety of ways linking with other subjects, where appropriate.
- Have memories for life from visitors, visits and rich experiences
- Feel prepared for the next stage of their geography education and part of their adult life
- Feel proud of themselves, their communities and their place
