

Clue 4: Noisy Rockets

A number of rockets are launching. They each make a different sound. Which single letter appears the most times across the sounds? The most popular single letter represents the first letter of the winner's first name.

The astronaut's first name begins with the letter ____.

Clue 5: Real or Nonsense?

Lots of asteroids have been found in the school playground. They all have words written on them; either real or nonsense. Can you read the words and decide whether they are real words or nonsense words?

The number of nonsense words $\times 2$ is the age of the winner.

The number of nonsense words is _____.

Therefore, the age of the winner is _____.
