LI: To solve problems involving halving.
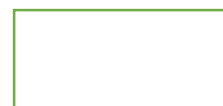

I can draw a picture to solve a problem	
I can share into equal groups	
I can solve a halving problem.	

Can you draw a picture to show how you work this out?

Sam wants to give half her hair bobbles to her friend.

How many does she give away?

Phillip gave half his felt-tip pens to his friend.
How many did he give away?

Phillip gave half his felt tip pens to
his friend. How many did he give away?
